

MODULAR BUILDING SOLUTION

MADE IN CANADA

MS45 BUILDING SYSTEM

A modular aluminum building system ideally suited for roof top service walkways, safety guard rails, aluminum framing and much more.

A game changer for roofing contractors, metal building erectors, facility owners and anyone else looking for a flexible construction solution.

HOW IT GOES TOGETHER

One 45 mm profile. Connecting components machined in-house. Standard metric hardware. Bolted, not welded.

WALKWAYS

GUARDRAILS

PLATFORMS

LADDERS

FRAMING

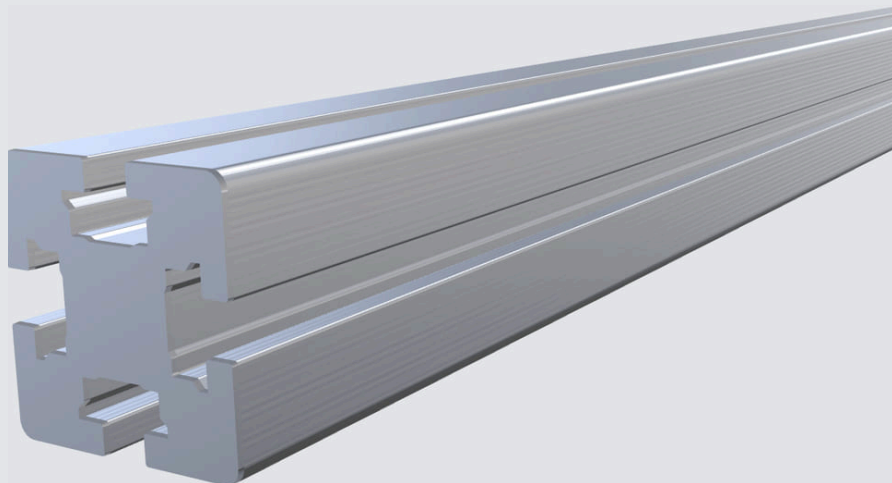

THE SYSTEM

MS45 heavy-duty profile. One system, unlimited applications.

**ONE SYSTEM.
YOUR NEW
CREATIVE
PLATFORM**

A 45 mm profile, so
connection details
stay consistent.

EXTRUDED IN CANADA.

CALL (403) 404-0271

Send us your drawing or photos for your project. We will tailor a cost effective solution for your project that is fast and easy to install.

BOLTED WITH STANDARD METRIC HARDWARE.

THE SYSTEM, MID-BUILD.

APPLICATIONS

Real installations, photographed on site.

WALKWAYS

Elevated walkways for getting across the roof.

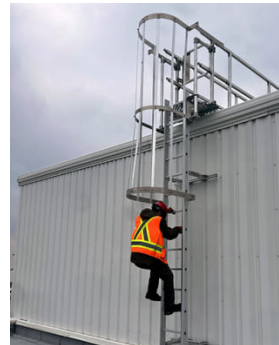

GUARDRAILS

Guardrail sections built from the same profile.

SERVICE PLATFORMS

A guardrail cage built around a rooftop unit.

ACCESS LADDERS

Caged ladders for getting up to the roof.

FRAMING SYSTEMS

Aluminum framing, bolted together from the same profile.

HOW TO WORK WITH US

No welder needed — bolted together, on site.

SEND THE PROBLEM

Send a drawing, photos, or a description of what you're trying to solve.

WE DESIGN IT

We supply the system and the design that goes with it.

WE SHIP IT

Ships across Canada, and to the US on request.

IT BOLTS TOGETHER ON SITE

Standard metric hardware joins the profile. No welder, and it adjusts after it's up.

GET IT IN YOUR BID.
